PROJECTS

Final project (IHK): baramundi pilot environment

COMPLETED

Planned, built, tested and documented a pilot environment as a basis for deciding on a possible replacement of Matrix42 Empirum. Four out of four Windows 11 reference clients fully deployed and inventoried.

Recovery Lab

EXISTING + EXTENSION

Lab with four Debian VMs, an application and a database. External backup and automated recovery are planned.

Ansible test lab

IN DEVELOPMENT

Reproducible configuration of test servers and clients with Ansible.

Interactive portfolio

ONLINE

vladimir-leicht.com – bilingual, accessible, built with Three.js, Blender and automated browser tests.
